

New York Stock Market

New York, November 28.—Irregular and contradictory movements gave the stock market a confused appearance to-day. Quotations gave way under the force of professional selling, after a fairly strong opening. During the remainder of the day, until just before the close, the list was weak, although the movement was comparatively narrow and only a few stocks lost more than a point. In the first fifteen minutes of trading there was a complete change. An active buying movement dispelled the weakness of the market, and prices bounded upward until at the close a large proportion of the list registered small gains. In some cases the brokers were pushed up 2 points from the low prices of the day, under the impulse of the sudden outburst, and closed with gains of a point.

Traders were bearish. The attack on United States Steel was especially vigorous, perhaps because of reports from Washington that the Stanley investigation was not to be terminated on account of the government's disapproval of the close of the steel trade was continuing.

Money rates made a further advance to-day. Some call loans were made at 3 1/2 per cent, the highest figure since the first of the year, and time rates were stronger.

Bonds declined after some irregularity. The local traction issues were purchased heavily at advances of 1 to 3 points. Total sales, par value, \$4,749,000. United States bonds were unchanged on call.

Total sales of stocks for the day were 3,500,000 shares.

New York, November 28.—Money on call firm, 3 1/2 to 4 per cent; ruling rate, 3 1/2 per cent. Time rates strong; sixty and ninety days, 2 1/2 to 3 1/2 per cent; six months, 3 1/2 to 4 per cent. Prime commercial paper, 2 1/2 to 3 per cent. The market was weak, with actual business in bankers' bills at \$1,500 for sixty days, and at \$1,540 for ninety days. Commercial bills, 60 days, \$1,500; 90 days, \$1,540. Bar silver, 55 1/2 cts. Mexican dollars, 46.

COTTON MARKETS.

New York, November 28.—After making new low records for the season early to-day, going to continued report of free cotton stock offerings, the cotton market rallied on covering and moved very steadily at a net advance of 1 1/2 points. The opening was steady at an advance of 1 point to a decline of 1 point, with December 1 points higher on covering by scattered shorts and in sympathy with rather steady prices for the season. The market was changed, completed late yesterday, ranged from 12 1/2 to 13 1/2, and closed at 13 1/2. A prominent Memphis trade report issued an estimate placing the commercial crop at 13,000,000 bales, which, under the unsettled weather, was regarded as a conservative estimate. The market was not much affected by this report, but it was considered unfavorable for planting. Receipts at New Orleans 100,000 bales, against 100,000 last year, and at Houston 20,000 bales against 10,000 last year.
